

RM SERIES

SEE. REACH.  
DO MORE.

It's time to throw out the old limitations and envision a warehouse operation that can do more. The RM 6000 Series with the exclusive MonoLift™ mast delivers more: breakthrough heights, capacities, visibility, and energy savings.

The RM 6000 Series has also achieved award-winning recognition. Since its introduction, the RM 6000 has earned three significant design awards:

- A Gold International Design Excellence Award (IDEA) from the Industrial Design Society of America. The honor marks the seventh consecutive year Crown has earned an IDEA Award.
- The prestigious GOOD DESIGN™ Award from The Chicago Athenaeum: Museum of Architecture and Design and The European Centre for Architecture Art Design and Urban Studies. Crown has won 12 GOOD DESIGN Awards.
- A Core77 Design Award. Crown's first venture into this global design competition netted a Core77 Design Awards trophy for the RM 6000 Series.

Discover how the RM 6000 Series can increase your operator, truck and operation-wide productivity.

**MonoLift™ Mast**

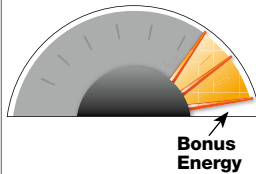

This innovative mast design offers unsurpassed rigidity— all the way to 505"— and substantially greater load capacity at height.

**Visibility**

The offset MonoLift mast and variable side-stance positioning work together to deliver unmatched visibility at height and ground level.

**Regenerative Lower**

The RM 6000 Series carefully uses energy and gives it back as the mast is lowered— extending battery life by as much as 15%.

**Traction Control**

OnTrac Anti-Slip Traction Control reduces tire spin and improves control through Access 1 2 3® technology.

**Xpress™ Lower**

The Xpress Lower feature increases lower speeds so the operator spends less time waiting for the load to lower and more time moving pallets.

**RM 6000** – A new age in narrow aisle.
